## NOTES TO FINANCIAL STATEMENTS

### **Note 1. Summary of Significant Accounting Policies**

#### A. Accounting Practices, Impact of NAIC/State Differences

The accompanying financial statements of AIG Insurance Company – Puerto Rico (the “Company”) have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the Commonwealth of Puerto Rico (the “IDCPR”).

Insurance companies domiciled in the Commonwealth of Puerto Rico are required to prepare their statutory financial statements in accordance with the National Association Insurance Commissioners’ (the “NAIC”) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the IDCPR.

Difference between Puerto Rico prescribed or permitted practices and NAIC statutory accounting practices (NAIC SAP) which affect the Company are the deferred income tax arising from temporary difference resulting from contributions to the Catastrophe Loss Reserve. The effect of that item was to increase the policyholders’ surplus on the Puerto Rico basis reported in these financial statements over that which would have been reported on the NAIC SAP basis. A reconciliation of the Company’s net income and policyholders’ surplus between the amount presented in the accompanying financial statements Commonwealth of Puerto Rico basis and NAIC SAP follow:

<b><u>Description</u></b>	<b><u>December 31, 2016</u></b>
Net loss, Commonwealth of Puerto Rico basis	\$ 5,097,658
Effect of state prescribed practices	
Net loss, NAIC SAP basis	<u>\$ 5,097,658</u>
Policyholders’ surplus, Commonwealth of Puerto Rico basis	\$ 91,590,782
Effect of state prescribed practices	
Effect of Puerto Rico prescribed practice to not recognize deferred tax liability for catastrophe reserve trust fund contributions	(13,534,704)
Effect of state permitted practices	
Policyholders’ surplus, NAIC SAP basis	<u><u>\$ 78,056,078</u></u>

#### B. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

#### C. Accounting Policies

Direct, assumed and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business and are based on reports received from ceding companies for reinsurance assumed. Premiums receivable are primarily due from agents and policyholders and are charged off when specific balances are determined to be uncollectible. After calculation of non-admitted amounts, an evaluation is made to determine if any allowance for doubtful accounts is required. In the calculation of non-admitted amounts, Puerto Rico regulations (see Note 1A) do not permit the consideration of the unearned premium offset on policyholder balances. The Company writes audit and retrospective business which results in premiums being billed in arrears. Estimates are made of ultimate annual premiums to be paid on these variably priced policies and accruals made for any additional premiums to be collected or refunded. These accruals are reflected within premiums receivable as earned but unbilled premiums or accrued retrospective premiums. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest, dividends and rent income less investment related expense. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Rental income includes an imputed rent for the Company’s occupancy of its own buildings. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write downs for impairments considered to be other than temporary.

Real estate investments are classified in the balance sheet as properties occupied by the company, properties held for the production of income and properties held for sale. Properties occupied by the company and properties held for the production of income is carried at depreciated cost less encumbrances. Properties held for sale are carried at the lower of depreciated cost or fair value less estimated cost to sell. This value would also be net of any encumbrance. The fair values of properties held for the production of income and held for sale are based upon quoted market prices, if available. If quoted market prices are unavailable, fair values are based upon market appraisals performed every five years using certified valuation techniques. Fair values for these properties will be immediately determined whenever circumstances indicate that the carrying amounts

### D. Reconciliation of Puerto Rico Income Tax Rate to actual effective rate

#### Puerto Rico income taxes

Property and casualty companies incorporated in the Commonwealth of Puerto Rico are taxed based on net income as computed on the basis of the Company's statutory accounting practices. Such income is adjusted for various temporary and permanent differences, mainly exempt interest income and certain amounts allocated to the write in surplus. The Company is also subject to an alternative minimum tax which is calculated based on a formula established by existing laws.

#### United States Virgin Islands income taxes

The Company is also engaged in business in the United States Virgin Island (USVI). Any income tax paid in this jurisdiction is taken as a foreign tax credit for Puerto Rico income tax purpose since, as a domestic corporation, the Company is required to report all its worldwide income in Puerto Rico.

### **Note 20 – Fair Value Measurements**

#### **1- Items Measured and Reported at Fair Values by Levels 1, 2 and 3**

Assets and liabilities recorded at fair value in the Balance Sheet are measured and classified in a hierarchy for disclosure purposes consisting of three "levels" based on the observability of inputs available in the marketplace used to measure the fair values as discussed below:

- Level 1: Fair value measurements that are quoted prices (unadjusted) in active markets that the Company has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. The Company does not adjust the quoted price for such instruments.
- Level 2: Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3: Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. These measurements include circumstances in which there is little, if any, market activity for the asset or liability. Therefore, the Company must make certain assumptions as to the inputs a hypothetical market participant would use to value that asset or liability.

Description	Level 1	Level 2	Level 3
Assets on Balance sheet at fair value			
Bonds			
Issuer obligations			2,516,027
Residential mortgage - backed securities			
Total Bonds			2,516,027
Common Stocks			
Mutual Funds	860,172		
Total Common Stocks	860,172		
Total assets on Balance sheet at fair value	860,172		2,516,027

#### **2- Inputs and Techniques used for Level 2 and Level 3 Fair Values**

The Company has no assets or liabilities measured at fair value in the Level 3 category.

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted market prices for similar instruments in an active market were utilized. This was accomplished by the use of matrix pricing. Matrix pricing takes quoted prices of bonds with similar features and applies analytic methods to determine the fair value of bonds held. Features that are inputs into the analysis include duration, credit quality, tax status and call and sinking fund features.

# GENERAL INTERROGATORIES

## PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?  
None
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.  
The Company, along with other affiliated companies, estimates the probable maximum loss by collecting detailed exposures data, running RMS/AIR models to estimate loss distributions, running Guy Carpenter MetaRisk model and a proprietary application for loss aggregation across various portfolios and CAT reinsurance recovery to derive net loss distribution. The modeling analyses are performed for all regions with material exposures to windstorms and earthquake, and some key countries to flood where a model is available.
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?  
The Company maintains catastrophe excess of loss reinsurance as protection from an excessive loss.
- 6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? Yes [ X ] No [ ]
- 6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss.
- 7.1 Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss ratio cap, an aggregate limit or any similar provisions)? Yes [ ] No [ X ]
- 7.2 If yes, indicate the number of reinsurance contracts containing such provisions:
- 7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)? Yes [ ] No [ ]
- 8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured? Yes [ ] No [ X ]
- 8.2 If yes, give full information
- 9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:  
(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;  
(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;  
(c) Aggregate stop loss reinsurance coverage;  
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;  
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or  
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. Yes [ ] No [ X ]
- 9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:  
(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or  
(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract. Yes [ ] No [ X ]
- 9.3 If yes to 9.1 or 9.2, please provide the following information in the Reinsurance Summary Supplemental Filing for General Interrogatory 9:

(c) A brief discussion of management's principle objectives in entering into the reinsurance contract including the economic purpose to be achieved.

(b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP? Yes [ ] No [ X ]
- 9.5 If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.
- 9.6 The reporting entity is exempt from the Reinsurance Attestation Supplement under one or more of the following criteria:  
(a) The entity does not utilize reinsurance; or  
(b) The entity only engages in a 100% quota share contract with an affiliate and the affiliated or lead company has filed an attestation supplement; or  
(c) The entity has no external cessions and only participates in an intercompany pool and the affiliated or lead company has filed an attestation supplement. Yes [ ] No [ X ]
10. If the reporting entity has assumed risks from another entity, there should be charged on account of such reinsurances a reserve equal to that which the original entity would have been required to charge had it retained the risks. Has this been done? Yes [ ] No [ X ] N/A [ ]
