## NOTES TO FINANCIAL STATEMENTS

### Note 1 - Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices, Impact of NAIC/State Differences

The accompanying financial statements of AIG Insurance Company – Puerto Rico (the Company or AIGPR) have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the Commonwealth of Puerto Rico (the IDCPR).

Insurance companies domiciled in the Commonwealth of Puerto Rico are required to prepare their statutory financial statements in accordance with the National Association Insurance Commissioners' (the NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the IDCPR.

Difference between Puerto Rico prescribed or permitted practices and NAIC statutory accounting practices (NAIC SAP) which affect the Company are the deferred income tax arising from temporary difference resulting from contributions to the Catastrophe Loss Reserve. The effect of that item was to increase the policyholders' surplus on the Puerto Rico basis reported in these financial statements over that which would have been reported on the NAIC SAP basis. A reconciliation of the Company's net income and policyholders' surplus between the amount presented in the accompanying financial statements Commonwealth of Puerto Rico basis and NAIC SAP follow:

Description	SSAP #	F/S Page	F/S Line #	12/31/2017	12/31/2016
Net Income, Commonwealth of Puerto Rico basis		4	20	\$ 315,008	\$ 5,012,825
State Prescribed Practices that are an increase/(decrease)					
State Permitted Practices that are an increase/(decrease)					
Net Income, NAIC SAP basis				<u>\$ 315,008</u>	<u>\$ 5,012,825</u>
Policyholders' surplus, Commonwealth of Puerto Rico		3	37	\$ 86,753,215	\$ 91,372,444
Effect of state prescribed practices					
Not recognize deferred tax liability for catastrophe					
reserve trust fund contributions	N/A	N/A	N/A	(12,005,021)	(13,534,704)
Effect of state permitted practices					
Policyholders' surplus, NAIC SAP basis				<u>\$ 74,748,194</u>	<u>\$ 77,837,740</u>

#### B. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

#### C. Accounting Policies

Direct, assumed and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business and are based on reports received from ceding companies for reinsurance assumed. Premiums receivable are primarily due from agents and policyholders and are charged off when specific balances are determined to be uncollectible. After calculation of non-admitted amounts, an evaluation is made to determine if any allowance for doubtful accounts is required. In the calculation of non-admitted amounts, Puerto Rico regulations (see Note 1A) do not permit the consideration of the unearned premium offset on policyholder balances. The Company writes audit and retrospective business which results in premiums being billed in arrears. Estimates are made of ultimate annual premiums to be paid on these variably priced policies and accruals made for any additional premiums to be collected or refunded. These accruals are reflected within premiums receivable as earned but unbilled premiums or accrued retrospective premiums. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

The Company routinely assesses the collectability of premium receivables. Based upon company experience, any uncollectible premium receivables as of December 31, 2017 are not expected to exceed the non-admitted amounts and, therefore, no additional provision for uncollectible amounts has been recorded. The potential for any additional loss is not believed to be material to the Company's financial position.

Net investment income earned consists primarily of interest, dividends and rent income less investment related expense. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Rental income includes an imputed rent for the Company's occupancy of its own buildings. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write downs for impairments considered to be other than temporary.

The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

The plan incorporates a "cash or deferred arrangement, intended to qualify under the income tax laws by which employees may elect to make pre-tax contributions to the Plan. Substantially all regular full-time employees of the Company are eligible to participate on a voluntary basis after completing certain service and age requirements.

Each plan participant is eligible, after three months of service, to make basic contributions the Plan of not less than 1% nor more than 10% of base pay plus overtime and sales commissions or \$15,000 whichever is less, on a pre-tax basis. The Company makes matching contributions of 100% of the first 6% of pay that an employee contributes to the Plan. Also, the Company contributes 3% of pay to all employees, regardless of whether or not an employee is voluntarily participating in the Plan.

#### **Employee Retirement Plan**

Employees of AIG, the ultimate holding company, its subsidiaries and certain affiliated companies, including employees in foreign countries, are generally covered under various funded and insured pension plans. Eligibility for participation in the various plans is based on either completion of a specified period of continuous service or date of hire, subject to age limitation.

AIG's U.S. retirement plan is a qualified, non-contributory defined benefit retirement plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974. All employees of AIG and most of its subsidiaries and affiliates who are regularly employed in the United States, including certain U.S. citizens employed abroad on a U.S. Dollar payroll, and who have attained age 21 and completed twelve months of continuous service are eligible to participate in this plan. An employee with 5 or more years of service is entitled to pension benefits beginning at normal retirement age 65. Benefits are based upon a percentage of average final compensation multiplied by years of credited service limited to 44 years of credited service. The average final compensation is subject to certain limitations. The employee may elect certain options with respect to their receipt of their pension benefits including a joint and survivor annuity. An employee with 10 or more years of service may retire early from age 55 to 64. An early retirement factor is applied resulting in a reduced benefit. If an employee terminates with less than 5 years of service, such employee forfeits their right to receive any pension benefits accumulated thus far.

2. Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

None

3. Policy on Transfers Into and Out of Level 3

The Company's policy is to recognize transfers in and out at the end of the reporting period, consistent with the date of the determination of fair value.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Assets and liabilities recorded at fair value in the Balance Sheet are measured and classified in a hierarchy for disclosure purposes consisting of three "levels" based on the observability of inputs available in the marketplace used to measure the fair values as discussed below:

- Level 1: Fair value measurements that are quoted prices (unadjusted) in active markets that the Company has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. The Company does not adjust the quoted price for such instruments.

## NOTES TO FINANCIAL STATEMENTS

---

### **Note 20 - Fair Value Measurements (Continued)**

- Level 2: Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3: Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. These measurements include circumstances in which there is little, if any, market activity for the asset or liability. Therefore, the Company must make certain assumptions as to the inputs a hypothetical market participant would use to value that asset or liability.

## PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?  
None
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.  
The Company, along with other affiliated companies, estimates the probable maximum loss by collecting detailed exposures data, running RMS/AIR models to estimate loss distributions, running Guy Carpenter MetaRisk model and a proprietary application for loss aggregation across various portfolios and CAT reinsurance recovery to derive net loss distribution. The modeling analyses are performed for all regions with material exposures to windstorms and earthquake, and some key countries to flood where a model is available.
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?  
The Company maintains an Accident Year Stop Loss coverage to protect the underwriting year from excessive losses arising from natural or man-made catastrophes and to ascertain PML is adequately addressed and covered.

Yes [ ] No [ X ]
- 7.2 If yes, indicate the number of reinsurance contracts containing such provisions:
- 7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)? Yes [ ] No [ ]

(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;

(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. Yes [ ] No [ X ]
- 9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
