## Notes to Financial Statements

### 1. Summary of Significant Accounting Policies

#### A. Accounting Practices

The accompanying statutory-basis financial statements have been prepared in conformity with accounting practices prescribed or permitted by the Office of the Commissioner of Insurance of Puerto Rico (Commissioner), which vary in certain respects from generally accepted accounting principles in the United States of America (GAAP). Prescribed statutory accounting practices include National Association of Insurance Commissioners' statutory accounting practices (NAIC SAP) that do not conflict with the Puerto Rico Insurance Code (Code) and administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The Commissioner requires that insurance companies domiciled in Puerto Rico prepare their statutory-basis financial statements in accordance with the NAIC SAP subject to any deviations prescribed or permitted by the Commissioner.

A reconciliation of the Company's surplus as reported in the accompanying statutory-basis financial statements and NAIC SAP is shown below. There are no differences between the Company's net income as reported in the accompanying statutory-basis financial statements and NAIC SAP.

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory-basis financial statements in conformity with accounting practices prescribed or permitted by the Commissioner requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the statutory-basis financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### C. Accounting Policy

**a.) Investments** - Bonds not backed by other loans and designated as highest quality or high quality (NAIC designations 1 and 2) are generally stated at amortized cost and any premium or discount is amortized or accreted to income using the interest method. All other debt securities (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.

Common stocks are carried at fair value under NAIC guidelines. The change in the fair value is recorded as a change in net unrealized capital gains (losses), a component of unassigned funds-surplus. Preferred stocks are stated at cost, at the lower of cost or amortized cost, or at market values under NAIC guidelines, depending on the assigned credit rating and whether the preferred stock has mandatory sinking fund provisions. Short-term investments include all investments whose maturities, at the time of acquisition, are one year or less and are stated at amortized cost, which approximates fair value.

## Notes to Financial Statements

Investment income consists primarily of interest and dividends. Interest is recognized on the accrual basis and dividends are recorded as earned at the ex-dividend date. Accrual of income is suspended for bonds that are in default or when the receipt of interest payments is in doubt. Realized capital gains and losses are determined under the specific identification basis and are recorded in earnings.

Declines in the fair value of invested assets below cost are evaluated for other-than-temporary impairment losses. Impairment losses for declines in fair value of debt and equity securities below cost attributable to issuer-specific events are based upon all relevant facts and circumstances for each investment, and are recognized when appropriate in accordance with NAIC SAP and related guidance. For debt securities with unrealized losses due to market conditions or industry-related events where the Company has the positive intent and ability to hold the investment for a period sufficient to allow a market recovery or until its maturity, declines in fair value below cost are assumed to be temporary.

**b.) Premiums and Related Commissions** - Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premiums reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance ceded. Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

**c.) Unpaid Losses and Loss Adjustment Expenses** - Unpaid losses and loss adjustment expenses include an amount determined from loss reports, individual case estimates and an amount, based on experience and industry data, for losses incurred but not reported. Such liabilities are based on assumptions and estimates, and, while management believes that the amount is adequate, the ultimate liability may be more than or less than the amounts provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed, and any adjustments are reflected in the period determined.

**d.) Reinsurance** - The Company seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable underwriting results by reinsuring certain levels of risk in various areas of exposure with reinsurers. Amounts recoverable from reinsurance are estimated in a manner consistent with the claim liability associated with the reinsured policy. All reinsurance contracts in place transfer underwriting risks to the reinsurers.

**e.) Fair Values of Financial Instruments** - The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

*Cash, Cash Equivalents and Short-Term Investments* - The carrying amounts of these instruments approximate their fair values due to their short-term nature.

*Premiums and Agents' Balances Due* - The carrying amounts of these instruments approximate their fair values due to their short-term nature.

*Bonds, Unaffiliated Common Stock, and Preferred Stock* - The fair value of investment securities available for sale is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as discounted cash flow methodologies, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions.

## Notes to Financial Statements

The Company invests its funds in accordance with Chapter 6 of the Puerto Rico Insurance Code. For Other-Than- Temporary Impairment (OTTI), the Company has the followings:

**Debt Securities** - The Company recognizes OTTI on debt securities when it is either probable that the Company will not collect all amounts due according to the contractual terms of the debt security in effect at the date of acquisition, or when the Company has decided to sell the debt security prior to its maturity at an amount below its amortized cost. When an OTTI is recognized, the debt security is written down to fair value as the new cost basis, and the amount of the write-down is recorded as a realized loss. During the year ended December 31, 2018, the Company did not have any investments in debts securities to be other-than-temporarily impaired. During the years ended December 31, 2017, the Company recognized OTTI losses on debt securities amounting to \$867,621.

**Equity Securities** - The Company recognizes OTTI on equity securities when, in management's judgment, the decline in value is not temporary, or when the Company has decided to sell the stock at an amount below its carrying value. When an OTTI is recognized, the equity security is written down to fair value as the new cost basis, and the amount of the write-down is recorded as a realized loss. During the year ended December 31, 2018, the Company did not have any investments in equities securities to be other-than-temporarily impaired. During the year ended December 31, 2017, the Company recognized OTTI losses on preferred and common stock in the amount of \$300,000 and \$11,685, respectively.

#### A. Inputs Used for Assets and Liabilities Measured at Fair Value

##### a. Fair Value Measurement by Levels 1, 2 and 3

The Company has categorized its assets and liabilities that are measured at fair value into a three-level fair value hierarchy as reflected in the table below. The Company follows Topic 820 to establish a fair value hierarchy that prioritizes the inputs for valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements), and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

**Level 1** - Quoted Prices in Active Markets for Identical Assets and Liabilities: Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

**Level 2** - Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair value of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not considered actively traded.

**Level 3** - Inputs are unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which a fair measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

The following table presents for each of these hierarchy levels the Company assets that are measured at fair value on a recurring basis at December 31, 2018.
