#### NOTES TO FINANCIAL STATEMENTS

#### **Note 1 - Summary of Significant Accounting Policies**

A. Real Legacy Assurance Company, Inc. (the Company) is organized under the laws of the Commonwealth of Puerto Rico to write principally commercial multiple peril and auto liability/physical insurance. The Company is a wholly owned subsidiary of Cooperativa de Seguros Múltiples de Puerto Rico (Parent Company or Cooperativa). The Company's business activities are with insureds located within Puerto Rico, the U.S. Virgin Islands and British Virgin Islands.

Business written through general insurance agents is collected by the general agents and remitted to the Company, net of commissions. Remittances are due 55 days after the closing date of the general agent's current account.

The accompanying financial statements of Real Legacy Assurance Company, Inc. have been prepared on the basis of accounting practices prescribed or permitted by the Commissioner of Insurance of the Commonwealth of Puerto Rico (Commissioner of Insurance), which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles (GAAP).

The Commissioner of Insurance requires insurance companies domiciled in Puerto Rico to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual subject to any deviation prescribed or permitted by the Office of the Commissioner of Insurance.

The Commissioner of Insurance has the right to permit other specific practices that may deviate from prescribed practices. The Commissioner of Insurance has adopted certain permitted accounting practices, which differ from those found in NAIC SAP. To that effect, the Commissioner of Insurance permitted the recognition of the deferred tax liability resulting from the contributions made over the years to the catastrophe loss reserve trust fund that would otherwise resulted under NAIC SAP.

The Commissioner of Insurance also permitted the Company the recognition of the actuarial loss related to an early retirement window that occurred in 2013 as a charge to unassigned funds (surplus) and to be amortized into net periodic pension cost within three years.

The monetary effects on statutory capital and surplus of using accounting practices permitted by the Commissioner of Insurance at December 31, 2016 and December 31, 2015 are as follows:

|  | 2016             | 2015             |

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Unpaid losses and loss adjustment expenses include an amount

determined from individual case estimates and loss reports and an amount based on past experience for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined. Actual results could differ from these estimates.

#### C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contract. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for both direct and ceded business. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable. In addition, the Company uses the following accounting policies:

- a. Short-term investments are stated at cost.
- b. Investments are valued in accordance with rules promulgated by National Association of Insurance Commissioners (NAIC). Bonds are stated at cost adjusted for amortization of premiums and accretion of discounts. The disclosures of estimated fair values are based on NAIC -quoted prices when available. If quoted prices are not available, fair values are based on quoted market prices of comparable instruments or values obtained from independent pricing services. Investment transactions are included on the basis of the trade date. The interest method is used to record bond amortization. The Company monitors the difference between the cost and estimated fair value of their investments. A decline in the fair value below cost that is deemed to be other than temporary results in a reduction in the carrying amount to fair value with a charge to operations and a new cost basis for the security is established.
- c. Common stocks from investment in subsidiary are accounted for under the statutory equity method and adjusted to reflect the equity in the results of operations as an increase or decrease in surplus.
- d. The Company does not own preferred stocks.

#### **Note 2 - Accounting Changes and corrections of errors**

During the year ended December 31, 2016, the Company became aware of an accounting error that occurred in previous years. The accounting error resulted in a reduction in the surplus of approximately \$4.6 million. The Company has requested the Commissioner of Insurance a permitted practice to permit the Company record the corresponding adjustment during year 2016 as "Aggregate write-ins for special surplus funds" with the description "Correction of an error in previously reported financial statements".

#### **Note 9 - Income Taxes**

The Commonwealth of Puerto Rico enacted on September 1, 2004 the General Law of Cooperative Institutions of 2004 ("Law No. 239"), which provides a 100% exemption from income tax, and property and municipal taxes to cooperative institutions, including its affiliates and subsidiaries entities.

Prior to July 1, 2016, the Company had operated as a regular corporation for income tax purposes. Effective July 1, 2016, the Company is under the tax exemption of its ultimate parent company, Grupo Cooperativo Seguros Mulitples, which operates under the provisions of Law 239 and therefore is exempt from all taxes levied by the Commonwealth of Puerto Rico or any political subdivision thereof. As a result, the Company will not incur prospectively any additional income tax obligations, and future financial statements will not include any additional tax obligations, nor provision for income taxes. Prior to the change in tax status, income taxes currently payable and deferred income taxes were recorded in the Company's financial statements.

Prior to July 1, 2016, income taxes were accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities were measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

The Company reviewed its deferred tax assets for recoverability and establishes a valuation allowance based on historical taxable income, projected future taxable income, applicable tax strategies, and the expected timing of the reversal of existing temporary differences. A valuation allowance was provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company recognized deferred tax assets for the future tax consequences attributable to differences between the financial statements carrying amounts and the respective tax bases for income tax expense calculations. The components of the net deferred tax assets recognized in the Company's statements are as follows:

#### Gross deferred tax assets:

## Note 12 - Retirement Plans, Deferred Compensation, Post-employment Benefits and Compensated Absences and Other Postretirement Benefit Plan

#### A. Defined Benefit Plans

The Company sponsors a non-contributory defined benefit pension plan covering all of its employees and those of its wholly owned subsidiary. The benefits are based on the years of service and employees' average annual compensation as defined in the plan document. The measurement date used to determine pension benefit measures for the defined benefit pension plan is December 31.

The Company's funding policy is to contribute annually the minimum funding requirement under the Employee Retirement Income Security Act of 1974 and related regulations. For year 2016 and 2015 the actuarial valuation indicated a minimum employer contribution requirement of \$1,000,000 and \$1,500,000 respectively. Each year the Company charges as pension expense the amount funded during the year and the plan is funded in accordance with ERISA requirements subject to management's discretion and IRS minimum and maximum limitations.

Statement of Statutory Accounting Principles (SSAP No. 102) became effective Jan. 1, 2013. This SSAP requires that any underfunded defined benefit pension amounts, as determined when the projected benefit obligation exceeds the fair value of plan assets, to be recognized as a liability under SSAP No. 5R. At transition, the unrecognized transition obligation amounted to \$2,641,247.

The discount rate assumed rate of return used to determine the actuarial present value of the accumulated plan benefits was change from 5.48% at December 31, 2015 to 4.42% at December 31, 2016. The actuarial cost method used to calculate the pension contribution was the aggregate cost method. Plan assets consist mainly of investments in U.S. Government securities, mutual funds and cash.

The following sets forth the plan's benefit obligation, non-vested pension benefit obligation, fair value of plan assets, funded status and prepaid benefit cost at December 31, 2016 and 2015:

The asset allocations of the Company's pension benefits as of the December 31, 2016 measurement dates were as follows:

| Asset category            | %    |
|---------------------------|------|
| Debt securities           | 49%  |
| Mutual funds              | 36%  |
| Cash and cash equivalents | 15%  |
|                           | 100% |

The Company's investment policies and strategies for the pension benefits plan do not use target allocations for the individual asset categories. The Company's investment goals are to maximize returns subject to specific risk management policies. Its risk management policies permit investments in mutual funds and prohibit direct investments in corporate debt and equity securities and derivative financial instruments. The Company addresses diversification by the use of mutual fund investments whose underlying investments are in domestic and international fixed income securities and domestic and international equity securities. These mutual funds are readily marketable and can be sold to fund benefit payment

obligations as they become payable.

The Company expects to contribute \$1,100,000 to its pension plan in 2017. The benefits expected to be paid by the pension plan are as follows:

Year ending December 31:

| 2017      | 1,606,309 |
|-----------|-----------|
| 2018      | 1,599,596 |
| 2019      | 1,598,607 |

| 2021      | 1,635.772 |
| 2022-2026 | 8,461,127 |

The expected benefits are based on the same assumptions used to measure the Company's benefits obligation at December 31, 2016 and include estimated future employee service.

The Company has 300,000 shares of \$10 par value common stock authorized issued and outstanding. The Company has no preferred stock authorized, issued or outstanding.

- B. The Company has no preferred stock outstanding.
- C. Dividend Restrictions

Dividends on common stock are paid as declared by the Board of Directors of the Company. Under applicable Puerto Rico insurance laws and regulations, the Company is required to maintain minimum capital stock of \$3,000,000. The payment of dividends is limited to unassigned surplus reported using statutory accounting principles.

Under local government regulations, the Company is required to establish a reserve for insurance written subject to catastrophic losses. The amount needed to comply with the catastrophe reserve requirement is based on the net direct catastrophe insurance premiums written in Puerto Rico. The Commissioner of Insurance of Puerto Rico will determine each year the percentage of contribution required. For 2016 this was 1.0% of the direct catastrophe premiums written subject to the reserve.

In addition, in August 1994, the Commissioner of Insurance issued a rule which limited the additions to the reserve if the ratio of the catastrophe reserve over the balance of capital and unassigned surplus is greater than the ratio of net direct catastrophe premiums over total premiums for the year. During 2006 a change to this requirement was made allowing insurers to increase the catastrophe reserve until it reaches an amount equal to 2% of its probable maximum loss (PML). If this reserve exceeds this figure, then the Company could be able to withdraw any excess after a written request to the Commissioner of Insurance.

#### **Note 20 - Fair Value Measurements**

Fair value hierarchy

The Company follows SSAP 100 which establishes an accounting standard for fair value measurement of financial assets and financial liabilities and for fair values measurements of nonfinancial items that are recognized or disclosed at fair value in the financial statements on a recurring basis. The accounting standard establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair values hierarchy are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for the identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

The Level in the fair value hierarchy with which a fair value measurement in its entirety falls is based in the lowest level input that is significant to the fair value measurement in its entirety.

The following table presents assets and liabilities that are measured at fair value on recurring basis at December 31, 2016 and December 31, 2015.
